

General

Missing punctuation after text or Fountain import

If some punctuation is wrong/mixed up — particularly things like quotation marks such as “...” and ‘...’ — when importing from a text or Fountain file, please check the encoding of your original text-format file.

The best encoding for import to Fade In is UTF-8. Older encodings, such as Western (Mac OS Roman), Windows-1252, or ISO 8859-1 may result in some punctuation, etc. being imported incorrectly.
