Exporting to Microsoft Word

The best way to export from Fade In to Microsoft Word is via Rich Text Format (RTF).

Fade In will export to RTF using **File > Export > Rich Text Format (RTF)**.

You can then import the resulting RTF file into Microsoft Word (or many other word processors).

It will retain most of standard screenplay formatting. Depending on the format/template you're using and any customizations, more or less cleanup of the imported RTF document may be necessary.
