

# General

## Does the software come as a download or as a physical package?

Fade In is a downloadable software product. It does not come on disc or other media.

This is for a couple of reasons:

1. It ensures that you're getting the latest version of the software. Fade In has frequent (free) updates, and any packaged version would quickly be out of date.
2. It helps keep costs down. Removing the additional costs of packaging and distribution helps keep Fade In affordable.

If you ever need to, of course, you can always copy the installer to a disc, USB stick, etc.
