General

Does Fade In include a grammar checker?

While Fade In includes both live and on-demand spell-checking (with additional third-party dictionaries available in many languages) it In does not currently have a grammar checker.

One reason for this is that screenplay grammar tends to break a lot of the rules of "proper grammar", and would therefore get flagged by any standard grammar-checking algorithm as being incorrect. (And additionally, every language would need its own screenplay-specific grammar checker.)
