Getting Started

Upgrading to the full version from the demo

How do I upgrade from the full version to the demo?

You can simply purchase the full version from www.fadeinpro.com, then download and install the full version of the software. You may find it more straightforward to remove any installed demo version first.

Will I lose my work? How do I get my documents into the new, full version?

As long as you've saved your work to your computer as .fadein file(s), you'll be able to (re)open them in the full version once it's installed. The demo version and the full version use the same file format.
