Fade In Mobile (old)

How do I log into a cloud storage service in Fade In Mobile?

(Please note: This entry refers to an older version of Fade In Mobile, which is no longer available.)

First you'll need to select the desired cloud storage service — Dropbox, Google Drive, or OneDrive — from the main menu.

You'll then find yourself on the file browsing screen for that service. Normally if you haven't authenticated/logged in yet, you'll be prompted to do so. If not, tap the **Account** button to forget any current login.

You'll be prompted to log in through the service's own login page. This is where you'll enter your username/email and password for the service. Note that Fade In Mobile does not see this page, or any of the information stored on it. It is only for the service to give access to Fade In Mobile.

Note that Fade In Mobile currently works only with .fadein files. Any other type of file can be easily converted using the desktop software.
