

Formatting

Dual dialogue

To format dialogue by two characters as dual dialogue (i.e., simultaneously spoken), simply select/place the insertion point on the first character element and select **Format > Make Dual Dialogue**.

For example:

```
      BOB
I am saying this.
      ALICE
I am saying something else.
```

By placing the cursor on "BOB" and selecting Dual Dialogue, it will change things to:

```
      BOB                ALICE
I am saying this.      I am saying something else.
```
